

# CASE STUDY

PROVIDING A FOOD MANUFACTURER  
VISIBILITY INTO ITS SECURITY  
EVENTS AND MANAGEMENT

## CLIENT OVERVIEW

The client is a mid-tier food company that manufactures, markets, and distributes spices, seasoning mixes, condiments, and other flavoring products around the globe.

Food Processing

300-500

SIEM Tools

## THE CHALLENGE

To ensure continued protection of its recipes, trade secrets, and intellectual property, the client required full visibility of security events for better information security management.

## THE SOLUTION

Over 4 weeks, CPS deployed a platform that provided security intelligence of the organization's infrastructure by centrally aggregating all events as they occur in real-time, correlating such information with its threat database to allow the organization move from a reactive to proactive approach to security. While meeting compliance requirement from critical system components such as Servers, network devices and applications.
